

## 3D Innovation Lab Hosts Engineering Camp Students

6 Aug 2018 –

UTC's 3D Innovation Lab participated in Engineering Technologies Camp, 23-27 July 2018. Administered by Ohio University's Russ Research Center, the camp provided 7<sup>th</sup> through 10<sup>th</sup> graders hands-on opportunities to learn about robotics, 3D printing, and other key technologies, with events held at high-tech businesses around OU's Beavercreek site. The 3DI Lab introduced the five teams (34 students total) to 3D printing, metals additive manufacturing, and laser micromachining through interactive demonstrations. On the final day, parents received a crash course in the same technologies. UTC is excited about the future impacts these young creative minds will have on tomorrow's world!
